Working with the Bayes team, we are developing a suite of tools to streamline access to funding information, track application progress, and prioritize engagement:

1. **AI-supported funder database** – maps funders by sector, grant type, and funding cycle, while automatically tracking open calls and deadlines. The database also captures **bilateral engagement priorities for each funder** and links them to specific AfCEN projects to guide strategic outreach.
2. **Secure project datarooms** – dedicated to each AfCEN project, housing concept notes, budgets, and supporting materials to accelerate application submissions and facilitate investor diligence.
3. **Interactive funding dashboard** – visualizes connections between funding opportunities, project readiness, and application status. It also highlights **project-specific funding gaps, open calls, and priority funders** to inform next steps.

AfCEN Core Funding and Fundraising Outlook

Category	Estimated Annual Need (USD)	Potential Funders / Mechanism	AfCEN Core Budget to built out over the next week
Core operations (staff, offices, systems)	M / year	DOEN Foundation, IKEA Foundation, Mulago Foundation, Kaplan foundation	
Convenings / visibility	M		
Research & pipeline development	M		

Key 2026 Priorities:

1. Develop Assets needed for Core funding discussions
2. Shift from grant-led TA to blended finance and project preparation - team and org structure to reflect this
3. Expand core institutional partnerships
4. Launch AfCEN Investor Roundtable (Q2 2026) — convening financiers and development partners for multi-year alignment
